# MYSTIQUE 48 CC

## Built by Legends

Designed for the unforgiving waters of the North Carolina coast, the **MYSTIQUE 48 CC** is the premier, best-in-class, sport fishing vessel that compliments the finest concepts of the region's history-rich past with the latest in technological advances. With a "fishing first" focus, the **MYSTIQUE 48 CC** also appeals to the family with ample luxury, amenities, and styling.

With 100 years of combined expertise, Mystique Boatworks designers and builders have a proven track-record of constructing champion fishing vessels. Today, we are revolutionizing the large center console market.

Industry veteran Keith Stevens came to Mystique with over 12 years of experience in marine manufacturing and management. Keith partnered with boatbuilding icon Jim Luxton, best known for co-founding Jarrett Bay Boatworks. Jim has since been involved in the designs of numerous Custom Carolina sportfish. Rounding out our leadership team is Brian Cooke who brings 16 years of marine engineering and product development to Mystique.

## BEAUTY.

The natural, sleek lines of the **MYSTIQUE 48 CC**'s Carolina flair, along with the tumblehome curvature and sculpted integrated bracket with gentle turndowns create an artwork masterpiece. This completely unique boat, tailored to fit your needs, will make you the envy of all.

## AWE.

The **MYSTIQUE 48 CC** is a fishing boat built for fishermen. How the angler uses the boat is imperative to its design. We have created a premium boat that is fast enough to reach farther fishing ground than ever before, and returns the crew safely back to the dock in comfort, and feeling refreshed.

## POWER.

The **MYSTIQUE 48 CC** is in a class of its own, powered by four Mercury Marine V12 Verado 600 horsepower engines—a total of 2400 horsepower capable of propelling the craft to speeds in excess of 60 mph. Contra-rotating propellers maximize thrust and ease low-speed maneuvering.

## MYSTIQUE 48 CC

Exceed your expectations on the turbulent oceans with power and luxury.

<b>LOA</b>	48"
<b>Beam</b>	15'
<b>Max HP</b>	2400 HP
<b>Est Wt*</b>	30,000 lbs
